We are looking for a Compositor!

We are a Sydney based creative production studio, specialising in CGI and retouching, creating assets for print, online and TVCs.

Requirements:

- Our compositing work requires a high level of realism and understanding of the CGI world and its workflow, and to converse technically with the CGI team.
- Familiarity with ACES workflow would be a great advantage but not essential.
- Being able to composite complex render elements from CGI renders.
- Ability to work with green screen footage, integrate CGI into live-action shots, knowledge of colour, and colour spaces.
